WEDDINGSNAPS.AI FOR HOSTS

Wedding Snaps.ai

AI CAPTION

Friends laughing under warm
sangeet lights, hands raised
mid-song

sangeet

joy

pressed florals, silk ribbon, heirloom paper

Bring every wedding memory home.

Guests upload without an app, from the dance floor, dinner table, sangeet, afterparty, and quiet family moments. WeddingSnaps.ai gathers everything into one private place, captions and organizes it, and guides review so the couple is not left wondering which chat, phone, or folder has the missing moments.

No lost candids. Private review. Searchable memories.

AI-generated captions

Search by feeling or ritual

Private review first

Best-shot guidance

Gallery, guestbook, archive

Let guests share freely. Review it all calmly after.

The app turns guest uploads, photographer handoffs, vendor files, and guestbook notes into a private review path with captions, source labels, filters, and clear next steps.

1

Collect from every corner

Guest QR, family links, vendor uploads, photographer handoff.

2

Understand the moment

Captions, semantic tags, source labels, and moment context.

3

Choose with help

Filters, duplicate cues, best-shot guidance, helper lanes, and privacy checks.

4

Find it again

Search by ritual, feeling, person, scene, or phrase.

The wedding stays simple for guests: scan and upload. The memories stay private until the couple is ready.

WHAT HOSTS CAN FIND

Find the photo you remember, even if you do not know who took it.

WeddingSnaps.ai makes the archive feel human. Ask for a mood, scene, ritual, person, or moment and review the best matches privately before anything is shared.

Find by feeling

Try table laughs, quiet blessings, parents dancing, or sangeet energy.

Easy to scan

Every upload can become captioned, tagged, and easier to review.

Calmer review

Filters, queues, batches, duplicates, and best-shot cues speed decisions.

Private until approved

Nothing reaches gallery, wall, vendor, or downloads until approved.

Trusted helper lanes

Family and friends can shortlist with scoped, private review links.

Clean final handoff

Thank-you gallery, guestbook export, owner archive, and vendor picks.

private semantic search

guided review

captioned archive

THE PROMISE

A year later, the memories are still there.

The wedding does not end as a pile of uploads. It becomes a private, searchable archive the couple can return to, share carefully, and turn into thank-you galleries, guestbook keepsakes, vendor picks, and an owner archive.

AI CAPTION

Friends laughing under warm sangeet lights, hands raised mid-song.

sangeet

joy

quiet blessings

dance floor energy

No scrolling through old chats. No asking who had the video. No guessing which folder survived.

Capture

No-app QR uploads and private contributor links gather the whole story.

Curate

AI-assisted captions, review cues, helper lanes, and privacy gates reduce mess.

Rediscover

Search by scene, feeling, ritual, person, or phrase long after the wedding.

Scan for the host guide

Open the host planning flow and see private collection, review, search, and delivery together.
